

## AMENDMENT TO THE DRAWINGS

Substitute the replacement sheets of drawings attached hereto bearing Figures 1 and 2, and Figures 3 and 4, respectively for the original first two sheets of drawings bearing those Figure numbers. A marked up copy of the original two sheets showing the amendments is enclosed.

## REMARKS

In the Office Action mailed on July 12, 2005, Claims 1-20 were found allowable.

On page 2 of the Office Action Summary, the Examiner has required amendment of the drawings and amendment of the specification for the reasons as set forth therein.

## DRAWING AMENDMENTS

Figure 2 has been amended to delete the number 35 (this number was included in the drawing by inadvertence), and to add number 36, the optical axis (see the bottom of page 4 of the specification), and the number 52 for the base sloped surface (see the bottom of page 4 of the specification). The optical axis 36 extends from the micro-LCD 12 to the observer 94 and is perpendicular to the micro-LCD 12 (see page 4, lines 17, 23, and page 5, line 3). The number 52 has been added to Figs. 2 and 3 to show the base sloped surface of the prismatic lens 22 (see lines 23-25, page 4, and line 18-19, page 6).

Fig. 3 has been amended to indicate that the number 4 in Figure 3 is the legend Fig. 4 for the phantom line encircled area in Fig. 3. Fig. 4 is an enlargement of the encircled area. The number 52 for the base sloped surface has been added (see line 16, page 6).

It is respectfully submitted that Fig. 4 does not require amendment as is explained by the obvious amendment to the specification discussed below.

The amendments to the drawings are to the numbers only and not the structure. The amendments are supported by the specification as filed.

## SPECIFICATION AMENDMENTS

The second full paragraph on page 6 has been replaced with a paragraph identifying the chip with number 84. In the Figures, the chip 84 is illustrated having three LEDs 82 mounted on leg 30 connected to a wedge foot 32 of L-shaped wedge prism 14. The changes to this paragraph on page 6 by the replacement paragraph are obvious in view of Fig. 4. In view of the substitute paragraph, no amendment to Fig. 4 is required.

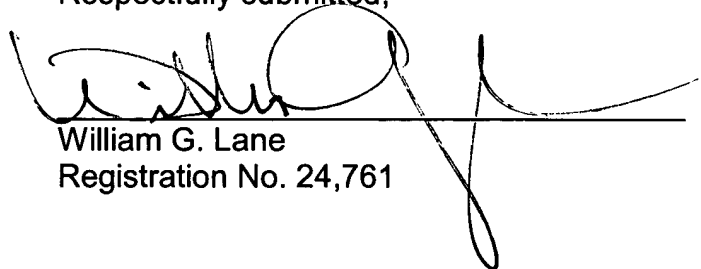

It is respectfully submitted that the amendments to the drawings and the specification are fully supported by the specification as filed and that the amendments correct slight defects in the drawing and the specification which relate solely to drawing numbers and do not make changes to the structure of the invention or the description of the invention.

It is respectfully submitted that the amendments to the specification and drawings fully comply with the Examiner's requirement set forth in the Action.

Date:

Sept. 2, 2005

Respectfully submitted,
